

AIM OF THE PROJECT

This project has been made for storing stock and customer records like booking number, name, contact number, check-in date, check-out date, charges for room etc. It contains addition, modification, deletion and searching of bills, generation of invoice as per requirements. Total amount is calculated automatically.

The main aim of my project is to book room easily and create invoice as per the entered booking number by the user. It helps to store the records of customer in particular tables and these record can be easily accessed by any person in fast manner.

STRUCTURE OF TABLE

Desc Login;

Field	Type	Null	Key	Default	Extra
Username	Varchar(20)	NO	PRI	NULL	
Password	Varchar(10)	YES		NULL	

Desc bookings;

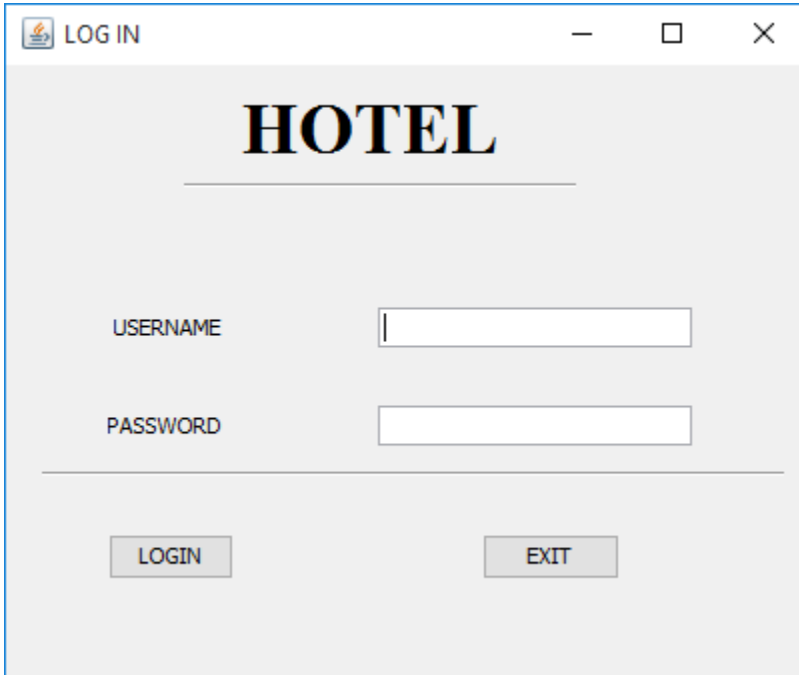

Field	Type	Null	Key	Default	Extra
Bookingno	Char(4)	NO	PRI	NULL	
NAME	Varchar(30)	YES		NULL	
CONTACT	Char(10)	YES		NULL	
ROOMNO	Char(4)	YES		NULL	
CHECK_IN	Date	YES		NULL	
CHECK_OUT	Date	YES		NULL	
AMT	int(8)	YES		NULL	

Desc room;

Field	Type	Null	Key	Default	Extra
Roomno	Char(4)	NO	PRI	NULL	
Roomtype	Varchar(30)	YES		NULL	
Status	Varchar(15)	YES		NULL	
Rate	int(4)	YES		NULL	

SOURCE CODE

1.LOG IN

The screenshot shows a Java Swing window titled "LOG IN". The window has a light gray background and a blue border. At the top center, the word "HOTEL" is displayed in a large, bold, black serif font, underlined. Below this, there are two input fields: one for "USERNAME" and one for "PASSWORD". The "PASSWORD" field is a standard text box, while the "USERNAME" field is a text box with a small cursor visible. Below the input fields, there are two buttons: "LOGIN" and "EXIT". The window also has standard Windows-style window controls (minimize, maximize, close) in the top right corner.

On Top:

```
import javax.swing.JOptionPane;
```

```
import java.sql.*;
```

```
private void jButton1ActionPerformed(java.awt.event.ActionEvent  
evt) {
```

```
// TODO add your handling code here:
```

```
String U=jTextField1.getText();
```

```
String P=new String(jPasswordField1.getPassword());
```

```
if (U.isEmpty())
```

```
{
```

```
    JOptionPane.showMessageDialog(this,"Username Not entered");
```

```
}
```

```
else if (P.isEmpty())
```

```
{
```

```
    JOptionPane.showMessageDialog(this,"Password Not entered");
```

```
}
```

```
else
```

```
{
```

```
    try
```

```
    {
```

```
        Class.forName("java.sql.DriverManager");
```

```
        Connection
```

```
con=DriverManager.getConnection("jdbc:mysql://localhost:3306/HOTE  
L","root","IP");
```

```
Statement stmt=con.createStatement();

evt) {  
    // TODO add your handling code here:  
    this.setVisible(false);  
    new BILL().setVisible(true);  
}
```

3.NEW BOOKING

The screenshot shows a Java Swing window titled "NEW BOOKING" with standard window controls (minimize, maximize, close). The main content area has a header "HOTEL HELIWAL HERITAGE" and a sub-header "NEW BOOKING". Below these are several input fields and a dropdown menu:

- BOOKING NO. :
- NAME :
- CONTACT NO. :
- CHECK-IN DATE :
- CATEGORY :
- CHARGES PER DAY :
- ROOM NO. :

At the bottom of the window, there are five buttons: "BOOK ROOM", "HOME", "GENERATE BILL", "CLEAR", and "EXIT".

On Top:

```
import javax.swing.JOptionPane;
```

```

6.VIEW USERS

The screenshot shows a Java Swing window titled "USER LIST" with standard window controls (minimize, maximize, close). The interface is divided into several sections:

- USER LIST :** A header section with a label "ENTER ADMINISTRATOR PASSWORD" and an adjacent text input field.
- Table:** A table with two columns: "USERNAME" and "PASSWORD". The table body is currently empty.
- ADD USER :** A section containing three text input fields labeled "ENTER USERNAME", "ENTER PASSWORD", and "CONFIRM PASSWORD". To the right of these fields are three buttons: "ADD", "CLEAR", and "BACK".
- DELETE USER :** A section containing a text input field labeled "ENTER USERNAME" and a button labeled "DELETE USER".

CONCLUSION

Hotel management software has been prepared to reduce manual work and with the help of this project total amount to be paid is being calculated automatically, room numbers are allotted on the basis of room type selected record are maintained logically, number days is calculated automatically etc.

Without management software, today's world would be nearly incomplete!
